

Adding a Room

1. On the Menu, select the “Settings” tab, then select “Rooms”.
2. Select the + button on the lower portion of the app, you will then be prompted to name the new room.
3. Now, when you add new devices, you will immediately have the option to add that device to this room.
 - You can create as many rooms as you wish, or even sections of you house, whatever makes sense for your settings.
4. To assign a device to a room.
 - Go into devices on the menu page, scroll to the device you would like to add to a room, or change rooms.
 - Tap the right arrow icon next to the device name, then select the dropdown below “Assign to Room”, and select the room the device is in.
